

MONTECARLO HLT

Luxury, performance and record concave design

FOR IMMEDIATE RELEASE – The new Montecarlo HLT wheel joins the OZ collections and is a new opportunity to customize the most exclusive SUVs and most prestigious Big Sedans.

The name, Montecarlo HLT, expresses the technical-style contents of OZ's latest product to perfection.

Noteworthy yet lean shapes, high-level mechanical resistance yet structural lightness, careful attention down to the finest detail and extraordinary concave design make the Montecarlo HLT the perfect mix of luxury, exclusiveness with the performance of a real one-of-a kind product.

As part of the ALL TERRAIN collection, there is no mistake at all about the personality of the Montecarlo HLT and what it is designed for: to create a new, exclusive way of customizing SUVs and BIG SEDANS.

Montecarlo HLT gives rise to a new style by teaming the technologies developed by OZ, which derive directly from F1 racing with an innovative design for this segment.

The 5-spoke single-body wheel has been engineered to highlight the concave design that can be found in the front and make it more extreme in the back, which is typical of high-caliber sports cars. The special knurling at the centre of spokes is a casting and adds to the design which already features a host of details such as the undercut that not only makes the wheel lighter but makes the spokes look longer. Produced with HLT technology and heat treatments that are used exclusively by OZ, Montecarlo HLT guarantees an optimal resistance/structural flexibility ratio as well as significant weight reduction when compared to wheels in the same category. Available in 20" and 22" diameters and can also be used with run-flat tires.

Like all wheels by OZ, Montecarlo HLT wheels are TÜV certified.
